VOLUME CONTENTS

Volume 56 (1988)

PHYSIOLOGY AND BIOCHEMISTRY

Properties of mitochondria isolated from greening soybean and lupin tissues
by J. Gerard and P. Dizengremel (Nancy, France) 1–7

Purification of virus-like particles from male-sterile *Vicia faba* and detection by ELISA in crude leaf extracts
by P. Dulieu, F. Penin, H. Dulieu and D.C. Gautheron (Dijon and Villeurbanne, France) 9–14

Changes in lipid composition during protoplast isolation
by J. Browse, C.R. Somerville and C.R. Slack (Palmerston North, New Zealand and East Lansing, MI) 15–20

Resistance to *Alternaria brassicae* and phytoalexin- elicitation in rapeseed and other crucifers
by K.L. Conn, J.P. Tewari and J.S. Dahiya (Edmonton, Canada) 21–25

Age-dependent appearance of specific proteins on cucumber surfaces under normal growth conditions
by H. Skubatz and B. Kessler (Ramat-Gan, Israel) 27–30

Glycerol concentrations in crop plants
by D.W. Gerber, R.U. Byerrum, R.W. Gee and N.E. Tolbert (East Lansing, MI) 31–38

Enhanced susceptibility of photosynthesis to high leaf temperature in triazine-resistant *Solanum nigrum* L. Evidence for photosystem II D_1 protein site of action
by J.M. Ducrue and D.R. Ort (Urbana, IL) 39–48

2,7-Dimethylocta-2,4-dienedioic acid is not a by-product of abscisic acid biosynthesis
by B.V. Milborrow, H.N. Nonhebel and R.D. Willows (Kensington, Australia) 49–53

Effect of acidic polypeptides on aluminium toxicity in tube growth of pollen from tea (*Camellia sinensis* L.)
by S. Konishi, I.B. Ferguson and J. Putterill (Auckland, New Zealand) 55–59

GENETICS AND MOLECULAR BIOLOGY

Inhibition of cell wall synthesis improves flow cytometric sorting of potato heterofusions resulting in hybrid plants
by K. Puite, W.T. Broeke and J. Schaart (Wageningen, The Netherlands) 61–68

CELL AND TISSUE STUDIES IN VITRO

Comparison of photosynthetic characteristics of two photoautotrophic cell suspension cultures of soybean
by S.M.D. Rogers and J.M. Widholm (Urbana, IL) 69–74

An alternative approach to plant regeneration from protoplasts of sour cherry (*Prunus cerasus* L.)
by S.J. Ochatt and J.B. Power (Nottingham, U.K.) 75–79

A simple method for direct transplantation of cultured plants to the field
by A. Selvapandiyan, J. Subramani, P.N. Bhatt and A.R. Mehta (Baroda, India) 81–83

C_4 photosynthesis and leaf anatomy in diploid and autotetraploid *Pennisetum americanum* (pearl millet)
by D.A. Warner and G.E. Edwards (Pullman, WA) 85–92

PHYSIOLOGY AND BIOCHEMISTRY

Peroxidase activity in relation to photoperiodic induction and electric potentials applied to petioles of spinach
by M. Montavon, C. Penel and H. Greppen (Geneva, Switzerland) 93–97

Changes in intracellular pH in French-bean nodules induced by senescence and nitrate treatment
by D. Pladys, P. Barthe and J. Rigaud (Nice, France) 99–106

Characterization and cross-reactivity of antibodies against ascorbate oxidase from green zucchini marrows (*Cucurbita pepo medullosa*)
by G. D'Andrea, A. Oratore, L. Avigliano, A. Rossi and A. Finazzi-Agrò (Rome, Italy) 107–112

Active site groups; chemical inactivation of mung bean phosphoglycerate kinase
by A. Kumar and P.O. Malhotra (Varanasi, India) 113–116

Lipid requirements of the plasma membrane ATPases from oat roots and yeast
by R. Serrano. C. Montesinos and J. Sanchez (Madrid, Spain and Heidelberg, F.R.G.) 117–122

Anthra-derivatives in suspension cell cultures of *Rhamnus frangula*
by A.J.J. van den Berg, M.H. Radema and R.P. Labadie (Utrecht, The Netherlands) 123–127

Polypeptides related to preferential digestion of male chloroplast nucleoids in *Chlamydomonas*
by S. Nakamura, C. Sato and T. Kuroiwa (Okazaki and Kidagun, Japan) 129–136

Localization of constitutive phytases in lily pollen and properties of the pH 8 form
by B.G. Baldi, J.J. Scott, J.D. Everard and F.A. Loewus (Pullman, WA) 137–147

Inhibition by vanadate of the tonoplast H^+ translocating ATPase of *Rubus* cells
by H. Henry and P.-E. Pilet (Lausanne, Switzerland) 149–154

GENETICS AND MOLECULAR BIOLOGY

An evaluation of the use of irradiated pollen for gene transfer in *Nicotiana*
by S.M. Reed, E.A. Wernsman, J.A. Burns and M.G. Kramer (Raleigh, NC) 155–160

Zein promoter activity in transiently transformed protoplasts from maize
by M. Schwall and G. Feix (Freiburg, F.R.G.) 161–166

CELL AND TISSUE STUDIES IN VITRO

Control of cell proliferation and differentiation by regulating polyamine biosynthesis in cultures of *Brassica* and its correlation with glyoxalase-I activity
by U. Sethi, A. Basu and S. Guha-Mukherjee (New Delhi, India) 167–175

Fertile plant regeneration from sunflower (*Helianthus annuus* L.) immature embryos
by M. Freyssinet and G. Freyssinet (Lyon, France) 177–181

GENERAL

Flow cytometry as a method for assaying the biological activity of phytotoxins
by D.L. Berglund, S. Strobel, F. Sugawara and G.A. Strobel (Bozeman, MT) 183–188

PHYSIOLOGY AND BIOCHEMISTRY

Identification and structural characterization of the glycinin seed storage protein A_7 subunit of soybean
by H. Kagawa and H. Hirano (Ibaraki, Japan) 189–195

Biosynthesis of poly(γ-glutamylcysteinyl)glycines in cadmium-tolerant *Datura innoxia* (Mill.) cells
by N.J. Robinson, R.L. Ratliff, P.J. Anderson, E. Delhaize, J.M. Berger and P.J. Jackson (Los Alamos, NM) 197–204

Hydroxyproline-arabinosylation in the endoplasmic reticulum of maize roots
by M. Andreae, W.C. Lang, C. Barg and D.G. Robinson (Göttingen and Kaiserslautern, F.R.G.) .. 205–212

GENETICS AND MOLECULAR BIOLOGY

Organ-specific mRNA in transgenic tobacco plants possessing T-DNA of Ri plasmids
by T. Nakamura, T. Handa, Y. Oono, K. Kanaya, M. Michikawa and H. Uchimiya (Ibaraki, Japan) 213–218

Ribulose 1,5-bisphosphate carboxylase-oxygenase small subunit transcripts as a susceptibility reflecting molecular marker in sunflower infected with *Sclerotinia sclerotiorum*
by A. Mouly, D. Roby and M.-T. Esquerré-Tugayé (Toulouse, France) 219–225

CELL AND TISSUE STUDIES IN VITRO

Chromosome behaviour and formation of micronuclei after treatment of cell suspension cultures with amiprophos-methyl in various plant species
by K.S. Ramulu, H.A. Verhoeven, P. Dijkhuis and L.J.W. Gilissen (Wageningen, The Netherlands) 227–237

The temperature response of cultured almond cells derived from tree sources with and without non-infectious bud failure. I. Specific growth rate
by C.A.L. Fenton, D.E. Kester and L. Liu (Davis, CA) 239–243

The temperature response of cultured almond cells derived from tree sources with and without non-infectious bud failure. II. Heat Shock
by C.A.L. Fenton, A.H. Kuniyuki and D.E. Kester (Davis, CA) 245–251

GENERAL

Effects of *Alternaria alternata* f.sp. *lycopersici* toxins at different levels of tomato plant cell development
by H.M.A. Witsenboer, C.E. van Schaik, R.J. Bino, H.J.M. Löffler, H.J.J. Nijkamp and J. Hille (Amsterdam and Wageningen, The Netherlands) 253–260

Factors influencing biocontrol of jimsonweed (*Datura stramonium* L.) with the leaf-spotting fungus *Alternaria crassa*
by C.D. Boyette and L.B. Turfitt (Stoneville, MS) 261–264

Subject Index Volume 56 265–268

Author Index Volume 56 269–270

Contents Volume 56 271–273
